

Amendment under 37 CFR 1.111
Hidehiko FUNAOKA et al.

U.S. Patent Application Serial No. 09/806,309
Attorney Docket No. 010311

AB2
Cont
0.05 to 5 mm, and the crystal lamellas of the polyolefin ^{which are} inclined at an angle θ of 80 to 100° to the plane constituting the membrane account for at least 40% of the total lamellas both on a section cut in the mechanical direction and on a section cut in the direction perpendicular to the mechanical direction and in the thickness direction.

27. (Amended) A battery separator comprising the microporous polyolefin membrane according to Claim 1.

AB2
28. (Amended) A battery comprising the microporous polyolefin membrane according to Claim 1 for its separator.

29. (Amended) A filter comprising the microporous polyolefin membrane according to Claim 1.
